# Highlights

### SpeechExec software

The SpeechExec software organizes the workflow of dictation files and resulting documents between author and transcriptionist and allows you to monitor the status of your work.
### Innovative meeting microphones

The innovative boundary layer design of the included meeting microphones uses the sound pressure of the table to provide excellent sound and recording quality with a 360 degree sound pickup radius.
### DSS, PCM and MP3 recording

The DSS format was developed for use in digital voice recorders, permitting a high compression ratio with little loss of quality while enabling you to store additional information in the file header. The PCM format allows stereo recording in CD-like audio quality and the MP3 format is the common audio format for consumer audio storage, as well as a de facto standard encoding for the transfer and playback of music on digital audio players.
### Exchangeable memory card

Virtually unlimited recording capacity thanks to an exchangeable memory card.

### Extendable solution

Easily extend the recording range of your Pocket Memo meeting recorder by simply connecting up to six meeting microphones.

### Automatic download via USB

When plugged in, the Pocket Memo dictation recorder automatically downloads your audio files directly onto the computer.

### Out-of-the-box solution

The Pocket Memo meeting recorder delivers excellent sound quality combined with easy-to-use technology right out of the box.

### Elegant metal carrying case

The elegant metal carrying case guarantees highest mobility and safe transportation.

### 360-degree sound pick-up

Sound pick-up from a 360-degree radius for a perfect recording experience.
